EXPERTISE: Design and realization of all building types, management of complex design and construction problems. Socially relevant design. Environmentally conscious buildings

Geoff graduated Architecture in 1975 from the University of Technology, Sydney. He became a Director of NBRSAP in 1986 with professional skills crossing a wide range of architectural categories. He has masterplanned, designed, documented and built many types of buildings with particular interest and expertise in masterplanning and educational campuses for both secondary and tertiary institutions in Australia and overseas.

Geoff has travelled extensively overseas keeping up to date with international trends. He is extensively involved on a tertiary college board and assesses masterplanning projects as a member of an architectural panel. Other than a keen interest in masterplanning, Geoff encourages the development of Ecological Sustainable building design and sensitive innovation solutions generally.

Geoff is also a registered heritage architect.
